Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.* The most common - and most serious - problem owners face is with the inverter. In some cases inverter problems mean you don't get any usable renewable electricity.

Why is my solar system not working?

Cause: Wiring or connection problems, such as loose or damaged wires, improper termination, or faulty connectors, can disrupt the flow of electricity within the solar system. Solution: Thoroughly inspect all wiring and connections, paying close attention to loose or damaged components.

How do I know if my solar panels are working properly?

Inspect the frames, mounting brackets, and sealants for wear, corrosion, or loose connections. Additionally, check for dirt, debris, or bird droppings that may obstruct sunlight absorption. Cleaning the panels with a soft brush and soapy water can help restore their efficiency if dirt or debris is present.

How do I troubleshoot solar panel problems?

To effectively troubleshoot solar panel problems, a systematic approach to diagnosis is necessary. By following these steps, you can identify the root causes of issues and take appropriate actions: Begin by conducting a thorough visual inspection of your solar panels.
