At 12.33 pm, the Spanish power grid experienced a loss of generation in the south-west of the country. Most likely, these were solar power plants, but the operator is not sure yet.

Blue Ridge Power, once a fast-growing leader in clean energy construction, will lay off 514 employees by mid-November, eliminating almost three-quarters of its staff.

The solar power generating facility that can be seen from Interstate 15, just across the state line from Primm, is set to partially shut down, according to its operators.

The Badajoz solar farm that set off the chain reaction was identified as Nunez de Balboa, a 500-MWp plant owned by utility group Iberdrola, Spanish news outlet El Diario reported, citing ...

The story of Ivanpah is not just about one project. It is a reflection of what has happened to concentrated solar power worldwide. A decade ago, it was seen as a leading option for...

LOS ANGELES (AP) -- What was once the world's largest solar power plant of its type appears headed for closure just 11 years after opening, under pressure from cheaper green energy sources.

Hundreds of millions of dollars in Australian retirement savings and state investments are at risk after three of the country's largest fund managers found themselves exposed to the spectacular...

On 04/28/2025, Spain experienced a major grid collapse that affected large swaths of the country and raised important questions about how far and fast we can push toward 100% renewable energy...
