China's new 1-gigawatt offshore solar farm combines innovative marine technology with clean energy production, powering 2.6 million homes while showcasing the future of ocean-based ...

Ever wondered how coastal regions could become the ultimate "power banks" for green energy? Enter seaside energy storage stations - the unsung heroes bridging renewable energy ...

Far off the coast of Shandong, a new kind of power plant is quietly feeding China's coastal cities. A vast field of solar panels, fixed to steel trusses in shallow water, has become the world ...

We design, build, install and operate offshore solar farm systems--co-located within offshore wind farms or stand-alone offshore and inshore--to produce clean, reliable and bankable power at sea.

Shanghai has approved the Fengxian 1# offshore photovoltaic project, the first commercial-scale solar-wind hybrid of its kind in China. The move marks a major step forward in the ...

In May 2022, China's first combined tidal and solar power station started feeding electricity to the grid, and the media waxed lyrical: "The sun and moon work together to generate ...

Sinopec has commenced operations of China's first commercial floating offshore photovoltaic (PV) project in a full-seawater environment.

We are pleased to announce that operations have begun at the East Seaside Power Plant. Through the operation of this solar power facility utilizing renewable energy, we will continue to ...
