These compressed spreads have lowered the energy arbitrage opportunity for batteries. However, despite another wet year in 2025, price spreads have risen back to 2022 levels. This effect is due to ...

Pending approval, a total of EUR167.6 million (\$187.1 million) has been allocated toward 46 standalone thermal and electrical energy storage projects, with a cost range from EUR170/kWh to...

Pending approval, a total of EUR 167.6 million (\$187.1 million) has been allocated toward 46 standalone thermal and electrical energy storage projects, with a cost range from EUR 170/kWh to EUR 409/kWh.

Spanish energy giant Iberdrola has revealed two new battery storage projects in Australia - its biggest yet in the country - that will take its total capacity to more than 1,500 gigawatt hours.

A significant winner is Iberdrola España, which was awarded energy storage projects in six autonomous communities in Spain for a total of EUR170 million (USD 198 million) to build batteries, ...

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes ...

The evolution of the Spanish energy storage market is marked by the incorporation of advanced technologies and cost reduction, which is making storage solutions increasingly accessible ...

The country's groundbreaking battery storage program has exceeded its original EUR700 million budget, growing to EUR840 million (\$964 million) to support a massive storage capacity ...
