Solar energy systems seem to be the most popular in CA and TX. These two states have the highest residential solar rates as well as the highest installed solar capacity overall.

Discover state solar power rankings in the U.S. Compare solar potential, incentives, and performance across all 50 states. Find out how your state ranks in solar energy.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

California has by far the greatest installed capacity of solar photovoltaic (PV) power of any U.S.

California Nevada Utah Arizona Hawaii Colorado New Mexico Rhode Island Massachusetts Texas Hawaii ranks fifth for solar energy because it is the most affordable state for going solar, with the average solar installation taking up 12.40% of the median household income. This affordability may be why Hawaii comes in second for the most solar installations. Over 133 MW of solar equipment is installed per 100,000 residents. Hawaii also ranks ... See more on forbes Author: Allie Ogletree usgs.gov U.S. Photovoltaic Database - USGS The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of ...

California is the best state overall for solar energy, while West Virginia is the worst. Many states fall somewhere in between for many different reasons, including cost, the number of solar...
