-----

A highly engineered data center cabinet solution that delivers fast, built-to-order configurability, best-in-class strength, and scalability regardless of the application.

Our pre-populated racks are built using tubular steel construction, and protected from hazards that often cause other racks to fail in transport. That's one more reason why we're trusted by some of the ...

Our solutions include modular, scalable, and IP-rated cabinets built from mild steel or stainless steel, engineered to manage cable density, airflow, and thermal loads while maintaining absolute safety ...

Alliance Steel provides stretcher-leveled, laser-quality flat steel for data center server racks, ensuring dead flat material, stability, and precision for seamless fabrication and assembly.

Designed to allow IT equipment to be pre-installed by the customer, partner or integrator before shipment, it features complete data center physical infrastructure and management software in a ...

The Vertiv(TM) DCE Rack System is designed to meet the flexibility, ease of installation, and delivery requirements of modern data centers, and is available in pre-configured or customized builds.

We design and manufacture customised steel components for data centres. More specifically, we produce data centre racks and cabinets that maximise the use of space in the facility.

Explore high-performance server racks, data center cabinets, and power distribution solutions from CPI. Optimize space, cooling and uptime today.
