Sumitomo Corporation, through Sumitomo Corporation of Americas (hereinafter collectively referred to as, "Sumitomo Corporation Group") announced today a tax equity investment ...

Common to all renewable energy sources is that the power generation is affected by factors beyond human control -- like time of day, weather conditions, or seasonal changes -- and inevitably ...

After more than a decade of experiment, we developed the EV Battery Station, a large-scale energy storage system that combines hundreds of reused batteries to provide high output and capacity so ...

Discover the leading solar, energy storage, and smart energy innovators exhibiting at Intersolar & Energy Storage North America Flagship 2026.

IDEX is seeking to increase its uptake of variable renewable energy (VRE) sources, including solar PV, and will install the flow battery system at Nagasu Energy Storage Facility, a ...

In response, IDEX has decided to construct an energy storage facility in Kumamoto Prefecture to help stabilize the supply of renewable energy. Sumitomo Electric's redox flow battery ...

The project is designed to manage electricity use by commercial operations in Minamikyushu. It stores energy generated by solar PV during the day and outputs it to the local grid ...

Our RF battery (installed capacity of 1,125 kWh: 250 kW x 4.5 hours) will serve as the energy storage system at this power plant, storing excess power during the day and releasing it at ...
