The design is made according to military specifications and the Rectifier Cabinet is suitable for use in a submarine for battery charging but can naturally be used in commercial applications as well.

Find out how much CO<sub>2</sub>e emissions you potentially could reduce on your vessel by supplying electric power from a shore connection, which pulls power from the utility grid, compared to generating ...

NORWAY & SWEDEN: PSW and Danfoss developed new OPS solutions in Stockholm, Ålesund and Haugesund/Karmsund. These compact, ...

A. Power Source - A shore connection system can be supplied either from the national grid or a local port internal distributed energy system, through a power frequency conversion or not, depending on ...

Discover W&#228;rtsil&#228;'s Alternative Maritime Power solutions for container ships, cruise ships, RoRo cargo ships, LNG carriers, tankers, and other vessels.

The Shore Drive Unit allows for change over to shore supply without blackout and the possibility to run onboard generators in parallel with the shore supply and optional onboard energy storage.

Description: A single-line diagram of the ship's service generator and switchboard connections for a destroyer. Components include a resistor, capacitor, transistor, and others.

Out at sea, the ship must generate, regulate, protect, and--when things go wrong-- restart its own electricity. This article is a complete, practical tour of the marine power generation system.
