Evecon, an Estonian renewable energy company, and Corsica Sole, a French company, will build two battery energy storage systems with a total capacity of 200 megawatts in Harju County ...

The 100 MW/200 MWh battery energy storage project in Kiisa began operation on February 3 as scheduled - just two weeks after a testing fault at the facility caused the most significant ...

A power system disturbance in Estonia on January 20 led to the shutdown of both EstLink interconnections with Finland, removing around 1,000 MW of capacity -- roughly 20% of the Baltic ...

The Estonian power grid is steadily building up more resources to accommodate growing demand from smart industries and meet sustainability goals. A new major milestone in this transition ...

As Europe races toward 2030 renewable targets, the Tallinn Power Storage Project has become a litmus test for grid-scale battery viability in northern climates.

The largest battery park in continental Europe was opened in Kiisa, Harju County, on Tuesday, capable of serving 90,000 households.

New project of tallinn energy storage company Evecon and Corsica Sole are joining forces in the Baltic Storage Platform joint venture to build and operate high-capacity battery storage power ...

Tallinn, Estonia's tech-savvy capital, has become a hotspot for new energy storage scale enterprises aiming to solve renewable energy's biggest challenge: inconsistency.
