The federal solar tax credit for homeowner-owned systems is no longer available. If you're reading this after 2025, use this article to understand how the credit changed--and evaluate ...

The federal tax incentives, or credits, for qualifying renewable energy projects and equipment include the Renewable Electricity Production Tax Credit (PTC), the Investment Tax Credit ...

With a host of tax and incentive programs, there are many reasons for taxpayers to install solar power generation systems. The tax benefits can include income tax credits, breaks on ...

In an effort to encourage Americans to use solar power, the US government offers tax credits for solar systems. The Inflation Reduction Act renamed and extended the existing solar tax ...

Some of the IRA's tax credits are specific to the domestic manufacturing and sale of qualified solar, wind and battery components. The IRA allocated \$369 billion for clean energy ...

Commercial taxpayers may now also choose a Production Tax Credit (PTC) for solar instead of an ITC. The PTC rate is 1.5 cents (adjusted for inflation, it is presently 2.6 cents). The full value of the PTC is ...

With the federal credit disappearing, homeowners will need to rely more heavily on state and local incentives, financing tools and the steadily falling cost of equipment.

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.
