Designed to house a variety of communications equipment, customers take advantage of our engineering and factory integration for complete turn-key solutions. The CNTCE product line ...

The mechanical structure enables the cooling system whenever messages such as over-temperature are detected. It provides a highly reliable power supply system and does not require a UPS or take ...

Rack 38 48V/800Ah (38.40kWh) [1] The energy and cabinet size can be designed according to the power supply time required by customer.

The enclosure helps to protect the electrical system, which contains electrical wiring, fiber optic devices, microcontrollers, routers, switches etc., against high temperature, moisture and humidity.

By 2025, the Thailand data center rack landscape is expected to incorporate advanced features such as modular designs, smart cooling systems, and integrated power management.

Node B Telecom Rack with Fans cooling System Heat Exchanger 800-1300 W Telecom Rack with Heat Exchanger can be load 800-1300 Watts Heat Exchanger 2000-3000 W Telecom Rack with Heat ...

Reliable and affordable IT enclosures for server rack and network rack applications with a proven design and essential features making them simple, faster to deploy, and easier to use in applications from ...

Thermoelectric cooler assemblies can operate for much longer with less power consumption, ensuring more reliable cellular coverage during power outages. Another requirement for a cooling system in ...
