Our compact and modular power distribution blocks distribute or group single phase or three phase electrical circuits from a single input source to several devices in the branch circuit.

Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Explore reliable, and IEC ...

Suitable for both on-grid and off-grid scenarios, our cabinets convert fluctuating energy prices into predictable costs, ensuring uninterrupted power supply for production lines even during grid outages, ...

View configurable and well-engineered 3-phase Power Distribution Unit (PDU) Cabinets from Eaton. Configure a power management system for your IT needs.

The HJ-SG-D02 Outdoor Communication Energy Cabinet is designed to provide a robust power solution for remote areas, such as those in rural Australia, where grid connectivity is unreliable.

This modular three-phase UPS fits seamlessly into any 19" rack, regardless of manufacturer, and delivers up to 120kW of power. Its versatile design simplifies the engineering and deployment of ...

Combining solar power, energy storage, and communication power in telecom cabinets boosts reliability and cuts energy costs. Proper sizing of solar panels and batteries ensures stable ...

Once your data center power distribution and back up equipment is on the network via a Power Xpert Gateway PDP or UPS card, data can be centralized and analyzed with Power Xpert Software.
