In 2024, global solar PV inverter shipments reached 589 gigawatts alternating current. Since 2018, inverter shipments worldwide have increased by almost 480 gigawatts.

Global PV inverter shipments grew by 10% to 589 gigawatts alternating current (GWac) in 2024. Asia Pacific, led by China, accounted for nearly all global growth, while the US and Europe ...

Global solar inverter shipments increased by 10% in 2024, reaching a total capacity of 589 GW, according to the 2025 edition of Wood Mackenzie's Global Solar Inverter Market Share report.

Solar power inverters convert the direct current (DC) energy produced by a solar panel into alternating current (AC). The different inverter types available in the market are central inverters, ...

Chinese companies made up nine of the 10 largest global inverter suppliers in 2024, with total inverter shipments reaching 589 GW (AC), according to Wood Mackenzie. Chinese ...

Global solar PV inverter* shipments grew by 56% in 2023 to 536 GWac, with China accounting for half of all shipments as the country's solar demand doubled in 2023, according to the latest analysis by ...

Global solar inverter shipments rose 10% YoY to 589 GW AC in 2024, according to Wood Mackenzie Asia led global inverter growth last year, while the US and Europe faced shipment ...

The global shipments of PV inverters increased by 10% to 589 gigawatts alternating current (GWac) in 2024, according to Wood Mackenzie.
