For over 70 years, the ASSAD Group has been the undisputed leader in the battery sector in Tunisia, and remains a major reference on the African continent. Our expertise in the ...

Lead-acid battery banks are also scalable to meet small to large-capacity storage needs. Many of the models chosen for renewable energy applications serve multi-purpose and are also used in a variety ...

Summary: This article explores the manufacturing costs of Battery Management Systems (BMS) in Tunisia, focusing on industry trends, pricing factors, and opportunities for businesses.

The batteries of the activity industrial batteries ASSAD have proven themselves in a multitude of sustainable applications, such as photovoltaic street lighting systems, solar traffic lights, solar ...

Find the Tunisian industrial leader in the manufacture of industrial batteries and the commercialization of lead-acid electric batteries.

Specializing in the production of lead-acid and lithium batteries, the group offers solutions tailored to a wide range of applications: starter batteries for light and heavy vehicles, industrial batteries for ...

Advanced lead acid batteries - the electrodes have carbon layers embedded onto them which prevents sulphation, leads to cost increases but these are alongside significant cycle life increases;

The construction characteristics of the recombination type lead-acid electric accumulators (valve-regulated hermetic accumulators); the absence of acid fumes and the virtual absence of gaseous ...
