A report by the International Energy Agency (IEA) recommends three strategies to accelerate the deployment of distributed solar and battery energy storage systems (BESS) in ...

Emerging markets are adopting cabinet storage for residential energy independence, commercial peak shaving, and emergency backup, with typical payback periods of 2-4 years.

This comprehensive analysis delves into the core drivers, technical solutions, and strategic pathways for deploying resilient solar-plus-storage systems across Ukraine, providing a ...

Ukraine could install five times more solar energy capacity than currently planned, according to a new study by Berlin Economics, commissioned by Greenpeace.

Signed on July 28, 2025, in Sofia, the deal marks a major step in energy transition for Southeastern Europe, combining SUNOTEC's expertise in solar infrastructure with Sungrow's globally acclaimed ...

Located in the Kyiv region of Ukraine, this project is designed for a local factory to ensure uninterrupted production during power outages. The system comprises 4 units of 50kWh + 2 units of 100kWh ...

Ukrainian private energy group DTEK plans to install a series of energy storage systems across Ukraine with a total capacity of 200 MW, investing EUR 140 million (USD 154.6m) in the project.

The top 15 solar energy storage manufacturers in Ukraine have played a key role in driving the transition to renewable energy, providing advanced technologies and reliable solutions to markets inside and ...
