The bifacial solar module is a state-of-the-art photovoltaic panel that captures sunlight from both the front and back sides, significantly increasing overall energy production.

Voltima Prima bifacial solar module. The bifacial solar module is a state-of-the-art photovoltaic panel that captures sunlight from both the front and the back, significantly increasing overall energy production.

Thanks to advanced shingle cell technology, this solar panel provides outstanding performance and flexibility, making it ideal for a variety of applications, including RVs, boats, and off-grid systems.

We are a high-tech enterprise engaged in the manufacture and sale of crystalline silicon solar cells, including 5 mono-crystalline and poly-crystalline solar cells. Founded in 2007, our company is ...

Thanks to their bifacial monocrystalline silicon cells, the solar modules of the VOLTIMA BSM series convert sunlight particularly energy-efficiently from both sides. Environmentally conscious energy ...

On this page you'll find a ranking of the best Voltima products in this category. To give you a quick overview, we've already ranked the most important information about the products for you.

Product Introduction The PSM-F series photovoltaic panel utilizes proven crystalline-silicon solar cell technology combined with advanced polymer composite materials to create a new generation of ...

VOLTIMA SunCase Plus - the mobile foldable mini solar power system With the VOLTIMA SunCase Plus, a real all-rounder for mobile power generation from sunlight is ready for you. The portable solar ...
