At Arsenalet Industrial Park, known for advanced production of defence products and technology, the establishment of Norway's largest renewable energy storage is now a reality.

Let's cut to the chase: Oslo builds largest energy storage station, and it's not just another infrastructure project. This 1.2 GWh behemoth, set to power 180,000 homes during peak demand, is ...

Longship is a carbon capture, transport, and storage project (CCS) partially funded by the state. The project involves industrial partners Heidelberg Materials, Hafslund Celsio, and the ...

Located in Norway, Northern Lights is the world's first CO2 transport and storage project open to industry, owned equally by TotalEnergies, Equinor and Shell. Operational since 2024, the ...

Norway's first carbon capture and storage project-the Northern Lights project, is a ground-breaking step in the fight against climate change.

Norsk Hydro will invest about \$110 million after tax to build the Illvatn pumped hydro plant in western Norway. From ESS News. Norsk Hydro has approved the construction of the Illvatn...

The project is said to reflect the Norwegian government's ambition to develop a full-scale CCS value chain in Norway, demonstrating the potential of this decarbonization approach.

For Equinor, offshore CO2 storage is an important piece of the puzzle to reduce residual industrial emissions and an integral part of our low-carbon hydrogen strategy where we for example aim to ...
