If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

There is no solar tax credit in 2026. However, if you installed solar panels before December 31, 2025, you may be in line for a tax break when you file your 2025 tax return. The U.S. ...

As of July 4, 2025, Congress passed the "One Big Beautiful Bill," which ends the 30% federal Residential Clean Energy Credit for solar panels and home battery systems. That means: Systems ...

To qualify for the federal solar tax credit, you must purchase the solar panels with cash or a loan, have taxable income, and it must be installed at your primary or secondary residence.

A practical 2026 guide for U.S. homeowners on going solar after the federal tax credit ends. Learn what changed, which state incentives still matter, the best financing options, and how solar plus battery ...

With the federal solar tax credit ending much sooner than expected -- you now only have until Dec. 31, 2025, to install a system and get the 30% solar tax credit -- it's definitely in your best...

Solar Panels or Photovoltaic Systems are solar cells that capture light energy from the sun and convert it directly into electricity. Use this buying guidance to learn more about your options, ask the right ...

Yes, you may be able to claim the credit for qualified upgrades, such as adding new solar panels, battery storage, or expanding your system--as long as the additions are installed and paid ...
