Impacts on Non-Residential Solar Will there be more changes? July 4 Update: President Trump signed the "One Big Beautiful Bill" (OB BB) into law, which terminates the 25D solar tax credit ...

Yes, the federal solar tax credit is going to officially end after December 31, 2025. This is no longer a distant possibility--it is already part of a real legislative proposal under review by Congress.

Time is running out for homeowners to capitalize on federal solar tax incentives. The 30% federal solar tax credit is disappearing on December 31st, 2025, seven years earlier than originally planned.

Section 1. Purpose. For too long, the Federal Government has forced American taxpayers to subsidize expensive and unreliable energy sources like wind and solar.

2025, Ending Market Distorting Subsidies for Unreliable, Foreign-Controlled Energy Sources, 90 F.R. 30821 (Executive Order 14315), regarding when construction of an applicable wind facility or ...

The clock is ticking on one of the biggest solar incentives in American history. Homeowners have until January 1, 2026 to claim the 30% federal tax credit--a benefit that can ...

Congressional Republicans passed the One Big, Beautiful Bill, which put the brakes on federal clean energy subsidies by terminating investment and production tax credits for wind and solar...

These are among the major clean energy investments now in question after Republicans agreed earlier this month to quickly end U.S. subsidies for solar and wind power as part of their ...
