Does Sumitomo Electric have a vanadium redox flow battery?

Sumitomo Electric has been proceeding with a vanadium redox flow battery (VRFB) pilot project in coordination with San Diego Gas & Electric, stemming from a partnership between Japan's New Energy and Industrial Technology Development Organization (NEDO) and the California Governor's Office of Business and Economic Development (GO-Biz).

Which redox flow battery is subsidized by Japan's government?

Japan's Sumitomo Electric is building the first redox flow battery to be approved for government subsidy in the country. The 2 MW/8 MWh facility, which is under construction on the island of Kyushu, will be subsidized under Japan's FY2024 Renewable Energy Expansion and Grid-Scale Energy Storage System Support Program.

What is Japan's energy subsidy scheme?

The subsidy regime, which backs utility-scale storage and water electrolysis, was introduced by Japan's Ministry of Economy, Trade, and Industry and the Agency for Natural Resources and Energy. The battery will be installed for oil distributor Shin-Idemitsu Co. Ltd. and is expected to be operational in October 2026.

While it is among the smaller VRFB systems Sumitomo Electric has deployed or been contracted to deploy in recent months in Japan and overseas, the project in Kyushu marks a first for ...

Hokkaido, Japan, has deployed one of the world's largest flow battery systems to store renewable energy from wind and solar. Hokkaido's flow battery project, spearheaded by Sumitomo ...

Sumitomo Electric has operated a 2 MW/8 MWh pilot vanadium flow battery in San Diego since December 2018 and is constructing a similarly sized facility on the island of Kyushu. Japan's ...

Sumitomo Electric Industries has followed up the US launch of its newest vanadium redox flow battery (VRFB) technology, announcing a deal in Japan. The company said last week (28 ...

This energy storage system is a positive step forward in Japan's future of clean power. It is also unique, as it utilizes an entirely different battery than one would expect. But we cannot help but ...

Japanese manufacturer Sumitomo Electric has released a new vanadium redox flow battery (VRFB) suitable

for a variety of long-duration configurations. Unveiled at Energy Storage ...

On 2 July 2024, Shanghai Electric Energy Storage Technology Co., Ltd. (hereinafter referred to as "Shanghai Electric Energy Storage") and Japan's Energyflow Co., Ltd ("EF") signed a 2MW/8MWh ...

The battery offered by Sumitomo Electric features long lifetime, unlimited cycle life, easy operation, and low maintenance. It is a safe and flexible energy storage solution that can be used for grid support, ...
