In 2025, we expect 7.7 GW of wind capacity to be added to the U.S. grid. Last year, only 5.1 GW was added, the smallest wind capacity addition since 2014. Texas, Wyoming, and Massachusetts will ...

With the new projects online, renewables (including wind, solar, geothermal and hydropower) and battery storage now make up 30% of the country's large-scale power generating ...

In summary, to better carry out capacity planning, decision-makers could set reasonable renewable energy development targets, prioritizing wind, solar, and energy storage systems, while ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity.

For the PPA RFP, Dominion Energy Virginia is seeking proposals for the acquisition of new solar, onshore wind, and energy storage projects in Virginia and North Carolina.

Thus, the goal of this report is to promote understanding of the technologies involved in wind-storage hybrid systems and to determine the optimal strategies for integrating these technologies into a ...

Clean energy companies are experts in finding the perfect area for new wind and solar farms and energy storage facilities. Companies must secure each of the elements below to move a project from ...

Where can I find siting resources for wind, solar, water, and geothermal projects? DOE resources below provide further information on siting and permitting for specific renewable energy technologies.
