WindInAction: Up to 8 days of wind and power generation forecasts by wind farm in 7 energy markets!

See the projected growth of the wind industry over the next 35 years. All units are in gigawatts (GW). Only states with total capacity over 0.1 GW are included per year. Find out more about the data by ...

In order to mitigate this uncertainty, it is crucial to improve the accuracy of generation forecasting methods for wind energy. This review explores various wind power forecasting methods, ...

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatthours (kWh) in 2023 to 286 billion kWh in ...

Use WeatherPower graphics to show daily wind and solar electricity generation based on weather of the day and installed capacity in your area.

The application automatically provides you with power production forecasts for your wind farms from very short-term (10 minutes) to medium-term (several months), with a delivery frequency ranging ...

Choose your location on the map and fill out the form below to see a chart with wind power production for the chosen turbine model (this determines your capacity). You can view the current forecast as ...

Wind power forecast and long-term wind projections for accurate energy planning and optimized wind farm operations. Improve your project performance today.
