Should I add solar panels to my existing system?

If you add solar panels to an existing system, you can increase your solar electricity generation, extend the life of your installation, and create further savings on utility energy costs.

Can I add more solar panels if my roof is old?

Do not add more solar panels to your system if your roof is old, it is a leased system, or if you do not have enough roof space for extra panels. Contact your original solar installer to add more panels to your system.

Why add solar panels to an existing solar system?

Can you add solar panels to a house roof?

Yes, expanding most solar energy systems is possible, but it isn't always cost-effective for various reasons. In some cases, adding solar panels might be more complicated and expensive than it may seem, but it is typically feasible. Adding solar panels to a house roof might involve modifying or adjusting part of the original system setup.

Should I add solar PV panels?

This can help determine if adding solar PV panels is the best action. Alternatively, if the PV system has a string inverter and no power optimizers, you can bump up the solar energy production by adding them. This is especially true on shaded roofs or where the panels have different orientations.

Already gone solar but need more energy for an EV, heat pump, ...
